# DAHLIAS

WE TAKE great pleasure in presenting you with our Dahlia catalogue for 1934. We list only novelties, and standard varieties of real merit, based on actual experience and personal observation. Our list does not include a large collection, but only such varieties that have been selected for their superiority in color, perfection of form, length and stiffness of stem, continuous blooming and keeping qualities. All new introductions are grown from introducer's stock.

We specialize on pot-grown, field-ripened Dahlia roots, grown under the most favorable climatic conditions. This is the most modern method of growing Dahlias. Every root that we send out is plump and clean, not forced for blooms, nor sapped of its vitality. These roots with ordinary care will produce for the grower a large quantity of very high-class flowers.

Roots and green plants will give equally good results, if plants are given immediate care upon arrival. Our plants are strong, hardy lath house grown stock. Packed by experts in ventilated containers, the plants travel safely on a six-day trip.

We supply roots after January 1st; pot-grown plants from May 1st to September. For terms of sale and guarantee, see last page.
